

# MESHUGGAH

The Quintessential Hi-Gain Profile Pack

REPLICANT AUDIO

## THE FORTIN MESHUGGAH KEMPER PACK

All rigs were made with Fredrik Thorendals private amp, and profiled by Jocke Skog at Sunmountain Facilities and Fear and Loathing Studios in Stockholm, Sweden. The was tweaked by Jocke Skog and Mike Fortin.

All rigs were made with the highest regard to detail and some has 2 or more microphones and/or post processing to perfect the particular sound. However, the goal was to have a starting point and then let the user make the necessary tweaks (if needed) since every person and every guitar has it's own character. There's an "overdrive pedal" in every program (bypassed by default) and there's also an EQ with a HP/LP filter for quick shaping of the profiles (bypassed by default).

**Cabs:** Mesa Boogie 4x12" Recto Standard, ENGL XXL 4x12 PRO, Marshall JCM800 Lead, Line6 Spider II 4x12"

**Mics:** TSM MT103, TSM MT184, TSM MT84, Shure SM57, Senheiser 421b, AKG C214, AKG C414, AKG C480, ROyer 121, sE Electronics V7x, Beyer M160, Audio Technia AE3000.
