Official NAM capture pack

Replicant Audio

Fortin KALI Pre-Amp

Thank you for choosing the Official Fortin Kali Pre-Amp Capture Pack by Replicant Audio.

As Mike Fortin's exclusive digital capture partner, Replicant Audio holds every release to his exacting benchmark. In collaboration with producer and longtime Fortin associate Steven Ward, we captured the authentic touch and response of the Kali Pre-Amp - delivering a seamless range from classic British crunch to contemporary saturation. Load your chosen IR following the capture, and play.

This collection comprises 20 thoughtfully profiled captures across standalone and Fortin Fourteen-boosted setups, offering a complete view of the Fortin Kali Pre-Amp.

REPLICANT AUDIO

CLEANISH

Gain level: 1

The Kali's standout achievement isn't merely its capacity for searing overdrive - it's the composure it maintains just before the edge. Channeling the timeless character of a vintage Plexi, it delivers authoritative, resonant tones engineered for hours of effortless play, regardless of your tuning. Light on its feet and exceptionally dynamic, the Kali rewards precision: push harder for harmonic grit, or lighten your touch for unblemished, pristine definition.

VINTAGE CHUNK

Gain level: 5

The enduring allure of the classic British stack isn't found in sheer aggression - it's in pure, unbridled torque. With just enough edge to hint at its pedigree, it invites expansive, open playing where every chord resonates with authoritative depth. Precision-tuned in E standard, it transitions seamlessly into Drop D without ever losing its balance, richness, or composure.

CLASSIC ROCK

Gain level: 3

Classic heritage, subtly reimagined. Taking the unmistakable foundation of Vintage Chunk, this bespoke calibration introduces a distinctly West Coast edge - as though tuned by hand in California for sharper focus and an extra reserve of character. Effortlessly composed in E standard, yet poised to unleash deeper authority the moment you drop into D.

ARENA ROCK

Gain level: 5

Engineered for the grandest stage. Crown this tone with cavernous reverb, a whisper of delay, and a delicate trace of pre-gain chorus to unlock an atmosphere of pure, stadium-filling triumph - capturing the electric poise of headlining Wembley at the pinnacle of your career. Precision-balanced for E standard, yet carrying unmistakable weight in Drop D.

00's Metal Rhythm

Gain level: 7

Step back to the dawn of the millennium, when rock and metal redefined their silhouette and struck from an entirely new angle. Defined by dense, muscular rhythms and relentless forward momentum, it evokes the iconic era of '00s metalcore, groove metal, and American heavy metal pedigree. Tailored specifically for Drop C and Drop D, delivering weight and clarity in equal measure.

Low Metal Rhythm

Gain level: 6

When your vision demands deeper reach than E standard allows, you will find effortless command right here. Featuring a tightly controlled low end built to handle the scale of extended-range guitars, it pairs ferocious modern metal authority with pinpoint articulation. Tuned in Drop A and 8-string E for players who refuse to sacrifice clarity for weight.

Crunchy Rock

Gain level: 6

A natural extension of the previous two captures, this profile strips things back to reveal an unmistakable, classic crunch. Built for those who came of age in the '90s and devotees of raw grunge spirit, it carries an authentic, unvarnished edge that never feels forced. Tuned for Drop D, delivering gritty poise and immediate presence.

All Gain

Gain level: 9

Smooth jazz phrasing, open-road country poise, and refined restraint - emphatically not built for high-gain chugging. Tuned in Drop A with effortless grace. And if you actually believed that… well, what can we say? Underneath the composed exterior sits a tightened low end and blistering gain engineered for low tunings where you want rhythms to turn gloriously, unapologetically feral. Bring a noise gate.

All Gain Lead

Gain Level: 10

Every reserve of gain - and then some. Engineered to soar effortlessly above the heavy rhythm work as a dedicated lead voice, it offers lavish sustain and deep, velvety compression tailored for expressive phrasing. Tuned in Drop A and versatile across any tuning, it turns soaring leads into pure, sustained authority.

Prog Rock

Gain level: 8

Deeper reserves of power, matched by unmistakable clarity. Even when the arrangement throws odd-time detours of thirteen at you without warning, your voice stays composed, articulate, and in command. Built in B standard to keep every note focused when the rhythm gets intricate.

Hex Drive Metal

Gain level: 8

A rare gesture of complete specification: we have even placed the Fortin Fourteen ahead of the signal in Hex Drive mode, tightening the low-end response to an astonishing degree of precision. Calibrated in Drop A, it delivers a taut, authoritative back end with effortless composure.

Reference: *NeuralDSP Fortin Cali Default.*

Remarkably Toolish

Gain level: 5

Once again, the Fourteen steps in to guarantee that every voice in your arsenal arrives with surgical precision. Tuned in Drop D, it delivers composed clarity and articulate balance - equally at home navigating intricate, shifting passages or fluid, expressive phrasing.

Reference: *Tool – Pneuma, Nick Johnston – Remarkably Human.*

Edge of Breakups

Gain level: 4

Right at the edge of breakup, certain voices let you play to your heart's content without a single compromise - and leave you with an assumed feeling of Vertigo. Calibrated in E standard, it captures effortless, aching dynamics and lingering warmth with quiet authority.

Reference: *John Mayer – Slow Dancing in a Burning Room.*

End of Metalcore

Gain level: 9

Rumors of metalcore's demise feel rather exaggerated when a voice this commanding still exists. Driven upfront by the Fourteen in 808 mode, it delivers raw, unfiltered authority - honestly, it borders on pure filth. Designed in Drop C for heavy, unyielding momentum.

Reference: *Killswitch Engage – The End of Heartache.*

Rooster In A Box

Gain level: 7

Tuned in E♭ standard, it carries unmistakable grit, swagger, and raw, untamed momentum.

Reference: *Alice in Chains – Man in the Box*, *Rooster.*

Melo Death Metal

Gain level: 9

Relentless output. Unapologetic edge. It's nasty, nasty, nasty - and we wouldn't want it a single degree tamer. Forged in Drop A for heavy, commanding authority at full tilt.

Reference: *Bleed From Within – I Am Damnation.*

B'tween Tone & Me

Gain level: 5

Among the most versatile voices in the collection, capable of adapting to almost any demand. Between you and me, it's built for everything. Calibrated in C♯ standard for composed range and effortless command across every mood.

Reference: *Between the Buried and Me – Famine Wolf.*

Vower In Me

Gain level: 7

Bright, immediate, and punchy—built to keep you palm-muting from the first chord of the gig until the moment you pull into the driveway back home. Constructed in Drop A for crisp attack and tireless energy.

Reference: *Vower – Dawn In Me.*

I'm Awake

Gain level: 6

A distinct midrange presence that carries you effortlessly above and beyond everyone else sharing the road. Tuned in E standard for bright articulation, expressive agility, and unmistakable lead authority.

Reference: *Intervals – I'm Awake.*

Blood Stan

Gain level: 10

Pure, unadulterated filth. This one leaves words behind - far behind. Disgusting in every sense, and we love every second of it. Made in Drop A for heavy, commanding authority.

Reference: *Periphery – Blood Eagle.*
